Dear Kyle and Jeni:

I cannot tell you how happy Susan and I are with the renovations that you recently completed at our home at 11 Golf Terrace in Ocean Reef. While we were pleased with the plans drawn by our architect, it was your ideas, your suggestions, and your touch that really made our new pool deck and front entrance so magnificent.

From the beginning of the project until the end, we never felt out of step with you. Jeni's weekly digital photos kept us up to date with the progress, and the many suggestions by both of you during the process helped us to save significant dollars on this renovation. You also have been incredible in making sure that every last detail is completed to our satisfaction, a characteristic I have rarely found in contractors.

Thank you for making what can be a horrendously difficult time actually enjoyable. Please feel free to use Susan and me as a reference. We could not be happier with the finished product.

Sincerely,
